PLEASE NOTE – resizing charges apply to all rings ordered in a different ring size from the stock ring size. Some variation in sizing may occur due to mould shrinkage. Sizing is approximate only. Please check with us first before ordering sizes from Assorted Sizes (N to R) to see what sizes are available. Not all sizes are kept in stock. Note – Rose Gold +10% White Gold +20%, where available. Not all designs can be done in different metals.

GEMSTONE SETTING INSTRUCTIONS FOR PRE-NOTCHED CAST SETTINGS

Adjust your setting to suit the size of your stone by taking the claws out further or bringing them in.

With a set of smooth nosed pliers, gently bend the prongs against your gem – do not tighten completely. It's best to work in an "X" pattern (prongs across from each other).

Take care with the point (culet). Make sure you keep this protected during setting. Once you are sure your gem is level, tighten the prongs. If using a setting with accent stones, be sure to set them first, before setting your main gem.

Most rings (except DSR rings) are available in 9ct, 14ct, & 18ct white, rose or yellow gold. Most 9ct yellow gold rings are kept in stock. Please allow 3 to 6 weeks for deliver of all special orders. Resizing charges apply to all rings ordered in a different size from the stock ring size. Please allow additional time for resizing of rings. Note – Rose Gold + 10% White Gold + 20%.

Our Triangle settings can be used for all three styles of cuts including triangle, trillion and "cut" triangles. To measure the size of any of these cuts, you measure from one tip to the center of the opposite side (see diagram). When choosing a setting for a triangle you use your measurement (ex. 6mm, fits a 6x6mm setting). If you have a cut triangle or a trillion cut I recommend that you buy the next larger size up (ex 6x6mm buy a 7x7mm setting). Of course, these recommendations are for well proportioned gems. If you have a belly cut gem, you may need to add an extra size to your choice.
